2nd year B.Tech CSIT Student at REVA ...
now •

One thing I've learned this semester is that understanding the logic behind a problem matters more than simply getting the code to work. While practicing C++ and Data Structures, debugging programs and working through problems helped me become more patient and systematic in my approach. I'm still learning, but each bug I fix gives me a better understanding of how to build solutions.

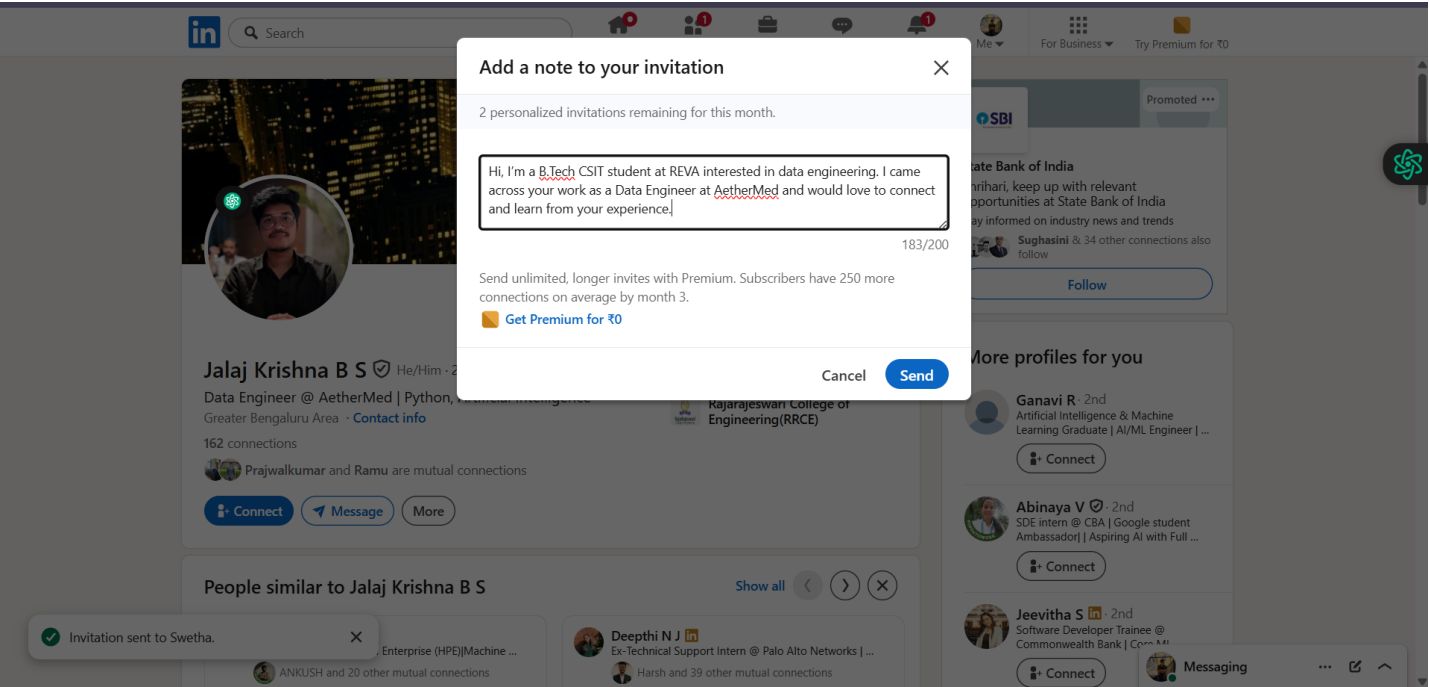

#DataStructures #Cplusplus #BuildInPublic
